VALUING LIFE

*... if the bees disappeared off the face of the globe,  
man would only have 4 years of life left...*

The importance of bees in the ecosystem is essential: they are responsible for the almost total pollination of all planets' inflorescences and so for the sustenance of plant biodiversity. Environmental causes, climate change and human irresponsibility are compromising the species.

Bees are therefore important indicators of the environmental quality.

The bee effectively represents the values of the **BOLISLIFE®** collection.

We will not change the world by ourselves ... but through **BOLISLIFE®** we will make a contribution.

### **BOLISLIFE®**

Film obtained from renewable natural raw materials.  
**VALUING LIFE.**

### **INNOVATION**

**BOLISLIFE®** is a world first.

### **FEATURES**

**BOLISLIFE®** is biodegradable and compostable, water and dust proof.

### **WORKABILITY AND APPLICATIONS**

**BOLISLIFE®** can be printed, overwritten, water-based coloured, laminated to different materials, embossed, ultrasonic welded and die-cut without restriction.

### **PRODUCTS**

**BOLISLIFE®** is used for the production of decorative ribbons, raffia, bows, gift wraps, shopping bags, boxes, cases and florist items.

The procedure for obtaining the "OK biobased" and "OK compost" certifications issued by Vincotte/TÜV Austria is in progress.  
This invention is covered by a registered patent application.
